

More choice. Make it Marcal.

PRODUCT CATALOG 2027

A MESSAGE FROM OUR CEO, ROB BARON

The needs of our industry are continually evolving. Distributors and facility professionals are looking for dependable partners who can provide greater choice, consistent quality and solutions that balance performance, efficiency and value.

Marcal has continued to evolve alongside them.

The addition of our paper mill in St. Catharines, Ontario expanded our North American manufacturing footprint and added in-house through-air-dried, or TAD, paper manufacturing capabilities. This investment strengthens our ability to support product innovation and quality while offering customers a broader range of solutions.

It does not change who Marcal is. It expands what we can offer.

Our recycled-paper heritage remains an important part of our company and portfolio. Today, it is complemented by conventional and premium virgin TAD products, hand care solutions, including soap, sanitizer and dispensers, and the return of Bella by Marcal® kitchen roll towels and napkins. Together with our controlled-use and universal dispensing systems, this expanded portfolio gives customers greater choice across a wide range of applications, performance needs and budgets, and positions Marcal as a more complete facility solutions partner.

As you explore this catalog, you will see more than a collection of products. You will see solutions designed to help distributors and end users meet the distinct needs of their facilities supported by responsive service, trusted partnerships and generations of papermaking experience.

Thank you for your continued partnership with Marcal. We look forward to helping you find the right solution for every space, every need, and every customer.

Sincerely,

Rob Baron
CEO, Marcal Paper

TAD TECHNOLOGY

Made by Marcal

GREATER CONTROL BEHIND EVERY ROLL

Marcal's acquisition of the St. Catharines TAD mill represents a significant investment in the products, capabilities and supply network supporting our customers.

Marcal has offered TAD towels for years. Today, owning TAD papermaking capabilities gives us greater involvement in how these premium parent rolls are produced, from fiber and sheet formation through conversion into finished towel products.

One partner - towel choices for a range of facility needs.

This expanded capability strengthens our ability to:

- Support a dependable supply of premium TAD towels
- Maintain greater oversight of product quality and performance
- Develop products around evolving customer needs
- Complement our broader portfolio of kraft, recycled and conventional virgin paper products

TAD WITHIN THE MARCAL PORTFOLIO

Not every facility, or every area within a facility, has the same needs. Marcal offers towel solutions across different paper types, applications and budgets.

Customers can choose among TAD, conventional virgin, recycled and kraft towel options based on the needs of each facility.

A CLOSER LOOK AT TAD TOWEL CONSTRUCTION

A better hand-drying experience starts with a better-performing towel. Through-air-dried, or TAD, technology creates a softer, bulkier and more absorbent sheet than conventional papermaking processes.

The towel's open structure creates channels that help draw in and hold moisture. When combined with high-quality fiber, the structure helps to deliver the absorbency, strength and softness expected from a premium towel.

The result is a towel that can dry hands effectively with fewer sheets while helping facilities improve the user experience.

What does TAD mean?

TAD stands for through-air-dried.

During production, heated air passes through the sheet as part of the drying process. This helps maintain a three-dimensional structure with channels that allow moisture to enter and be held within the towel.

UNDERSTANDING TAD TOWELS

Three-Dimensional Sheet Structure

The TAD drying process helps maintain an open sheet structure with channels that take in and hold moisture.

Premium Towel Option

TAD construction gives customers an option for facilities where the hand-drying experience is an important consideration.

Performance Across Applications

An excellent choice for offices, hospitality, healthcare, education and other facilities where performance and user experience matter.

BELLA IS BACK

Premium performance. Everyday versatility.

A familiar Marcal name is returning with a fresh purpose. Bella by Marcal® brings together dependable paper products designed for the places where people live, stay, gather and connect.

From extended stays and vacation rentals to hospitality, offices and foodservice, Bella by Marcal® offers quality towel and napkin solutions that make it easier to stock the essentials, all from a name you can trust.

TOWELS WITH A STRONG IMPRESSION

Bella by Marcal® premium TAD towels deliver exceptional softness, strength and absorbency. The through-air-dried manufacturing process creates a thick, absorbent towel with channels that quickly draw in and hold moisture.

Ideal for kitchens, breakrooms, vacation rentals, hospitality properties and other spaces where comfort, convenience and performance matter.

- Premium TAD performance
- Soft, absorbent and strong
- Ideal for residential-style and hospitality environments
- Available in practical formats for everyday use

A NAPKIN FOR EVERY OCCASION

Options for Every Budget

Service that provides an elevated guest experience, Bella by Marcal® napkins provide options across a range of materials, performance needs and budgets.

Multiple Application Opportunities

Choose from kraft and premium napkin selections for restaurants, cafés, hospitality, workplace dining and other foodservice settings.

Beautifully Practical

Bella by Marcal® products are made for real life: busy kitchens, quick cleanups and around the table. They combine the performance customers need with the flexibility businesses value.
